DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. In response to the Amendment received on June 24, 2009, the examiner has carefully considered the amendments/arguments.

Response to Arguments

3. Applicant's arguments, see Remarks, filed June 24, 2009, with respect to claims 1-20 and 22-24 have been fully considered and are persuasive. The rejection of claims 1-17 and 22-24 under 35 USC 102(b) as being anticipated by Schmidt (WO2003/03577) has been withdrawn. The rejection of claims 18-19 under 35 USC 103(a) as being unpatentable over Schmidt (as cited previous) in view of Vega et al (US2004/0029989) has been withdrawn. The rejection of claim 20 under 35 USC 103(a) as being unpatentable over Schmidt (as cited above) in view of Vega et al (as above) and Ghioghiu et al (WO2004/38445) has been withdrawn. After reconsideration of the pending office action and the cited references, the examiner agrees the limitation "energy curable intaglio security document printing ink", specifically "security document printing ink" is not a future intended use. It is deemed that with the overall teachings in the specification (see page 3, 2nd and 3rd paragraphs), as well as, the distinctions made during the prosecution history the printing ink, as well as the method for producing said printing, as found in the claims is distinguished over Schmidt, alone or in combination. Schmidt gives is not concerned with and/or is silent with regard to the fluorescing properties of the ink composition and/or the photoinitiators used in said ink under visible light conditions. Additionally, it is deemed the Vega et al and Ghioghiu et al are also silent with regard to the fluorescing properties of the photoinitiators in the ink compositions. Therefore it is deemed the prior art, alone or in combination, fails to teach and/or render obvious the energy curable intaglio security document printing ink as found in the instant claims, nor does the prior art, alone or in combination, set forth a method for producing said instantly claimed ink composition.

Allowable Subject Matter

4. Claims 1-18, 20 and 22-24 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892. The instant invention is distinguished over these cited documents since these fail to teach the use of an acylphosphine oxide photoinitiator, as well as, being silent with regard to fluorescing in the visible wavelength region when exposed to UV light.
